Olav Kyrre was the son of Harald Hardrada, the Norwegian adventurer who died at Stamford Bridge in 1066. While part of the invasion force, Olav stayed on board ship and missed the battle. He returned to Norway with his father's body and was crowned king along with his brother Magnus. With the latter's death in 1069, Olav ruled alone and peaceably, renouncing his father's aggressive foreign policy. As an interesting side note, the only Norse coin discovered in North America that can plausibly be attributed to Viking trade with the natives, the so-called "Maine Penny," is an Olav Kyrre penning of this type.

Numismatic Literature

2978. **Altekar, A. S.**, Coinage of the Gupta Empire; Volume IV, Banaras 1957, Numismatic Society of India, Banaras Hindu University, 390 pages, 92 plates, hardcover, with dust jacket, for the past 50+ years this book remains the bible of Gupta Coin classification. It comprehensively lists all the coin types and varieties of Gupta Gold coins. This book was compiled by Dr. A.S. Altekar over a period of years and is truly a must have for any library that wants to cover Indian Coins. To date, there is no other book that covers the entirety of Gupta Numismatics in such depth. While there is debate on some inconsistencies in the different classifications used by Dr. Altekar, it still remains as complete a work as possible and is the standard work on the series, scarce and hard to find \$120 - 150
