Burmese Kingdoms Featuring Coins From The Hans Mondorf Collection

1035. **BEIKTHANO:** AR 80 ratti (9.41g), ca. 450-600, Mitch-98:265 ff, rising sun // srivatsa temple, swastika left, bhadrapitha right, bold strike, EF, ex Hans Mondorf Collection \$120 - 160

Based on recorded finds, Mahlo has reassigned the Beikthano series to Halin and some unidentified potential mints not far from Halin, especially along the Samon River.

1036. **BEIKTHANO:** AR 80 ratti (9.30g), ca. 450-600, Mitch-98:277, Mahlo-8b.3, rising sun // srivatsa temple, simplified swastika left, damaru right with 3 pellets above, bold VF, ex Hans Mondorf Collection \$150 - 200

1037. **BEIKTHANO:** AR 80 ratti (9.35g), ca. 450-600, Mitch-98:277, Mahlo-8a, rising sun // srivatsa temple, swastika left, bhadrapitha right with 3 pellets above, bold VF, ex Hans Mondorf Collection \$110 - 150

1038. **BEIKTHANO:** AR 80 ratti (9.40g), ca. 450-600, Mitch-98:277, Mahlo-8a, rising sun // srivatsa temple, swastika left, bhadrapitha right with 3 pellets above, bold VF, ex Hans Mondorf Collection \$110 - 150

1039. **BEIKTHANO:** AR 80 ratti (8.94g), ca. 450-600, Mitch-98:280, Mahlo-56b, rising sun // srivatsa temple, bhadrapiṭha left, swastika right, pellet inside the moon, EF, ex Hans Mondorf \$120 - 160

1040. **BEIKTHANO:** AR 64 ratti (6.93g), ca. 6th century, Mitch—, Mahlo-55.1, rising sun // srivatsa temple, sankh shell left, swastika right, reduced weight series (perhaps 54 or 60 ratti), VF-EF, R, ex Hans Mondorf Collection \$200 - 250

Later local issue, perhaps from Halin or somewhere nearby.

1041. **CANDRA: Devacandra,** ca. 433-455, AR 24 ratti (1.98g), Mitch-98:72var, Mahlo-29.3.3, recumbent humped bull right // srivatsa, flanked by stylized leaf tendrils, Fine, RR, ex Hans Mondorf Collection \$120 - 160

Thick narrow silver coins of this style differ from the standard 64 ratti & 16 ratti pieces, likely the product of a different mint for local circulation. They also vary considerably in weight, as though there was not a fixed standard at that series.

See also lots 1042, 1044, 1045, 1046 and 1052.

1042. **CANDRA: Devacandra,** ca. 433-455, AR 24 ratti (2.32g), Mitch-98:72var, Mahlo-29.3.3, recumbent humped bull right // srivatsa, flanked by stylized leaf tendrils, Fine, RR, ex Hans Mondorf Collection \$120 - 160

1043. **CANDRA: Devacandra,** ca. 433-455, AR 64 ratti (7.61g), Mitch-98:71, Mahlo-29.1.5, recumbent humped bull right // srivatsa, moon left, tiny chip, bold VF, RRR, ex Hans Mondorf Collection \$300 - 400

1044. **CANDRA: Bhumicandra,** ca. 468-475, AR 24 ratti (3.06g), Mitch—, Mahlo-32.2.1var, recumbent humped bull left // srivatsa, flanked by stylized leaf tendrils, lovely example, VF, RR, ex Hans Mondorf Collection \$200 - 250

1045. **CANDRA: Bhumicandra,** ca. 468-475, AR 24 ratti (3.41g), Mitch—, Mahlo-32.2.1var, recumbent humped bull right, name letters in reverse order, with last letter below the first three // srivatsa, flanked by stylized leaf tendrils, unusual example, Fine, RR, ex Hans Mondorf Collection \$200 - 250

1046. **CANDRA: Bhumicandra,** ca. 468-475, AR 24 ratti (2.11g), Mitch—, Mahlo-32.2.2, recumbent humped bull right // srivatsa, Fine, RR, ex Hans Mondorf Collection \$120 - 160

1047. **CANDRA: Niticandra,** ca. 499-554, AR 16 ratti (1.90g), Mitch-98:84 ff, Mahlo-34.3.1, recumbent humped bull left // srivatsa, flanked by stylized leaf tendrils, double-struck, VF, ex Hans Mondorf Collection \$100 - 120

1048. **CANDRA: Prthvicandra,** ca. 569-576, AR 64 ratti (7.79g), Mitch-98:192, Mahlo-38 (same reverse die), recumbent humped bull left // srivatsa (also called axial pole in temple), superb example of an extremely rare type, of which Mahlo knew of just a single specimen, EF, RRR, ex Hans Mondorf Collection \$500 - 600

The rulers' dates cited in Mitchiner are based on the reign lengths inscribed on the stele found at Mruak-U in the Arakan region. Mahlo suggests that Mitchiner's dates are about 65 years too early.

1049. **CANDRA: Prthvicandra,** ca. 569-576, AR 16 ratti (1.90g), Mitch-98:193, Mahlo-38.2, recumbent humped bull left // srivatsa (axial pole in temple), excellent example, VF, R, ex Hans Mondorf Collection \$120 - 160

1050. **CANDRA: Dhrticandra**, ca. 576-579, AR 16 ratti (1.96g), Mitch-98:195/6, Mahlo-39.3, recumbent humped bull left // srivatsa (axial-pole in temple), VF-EF, **RRR**, ex Hans Mondorf Collection \$200 - 250

Assigned by the consignor to the ruler Chandrabandu, but the form of the seated bull and the two characters above suggest Dhrticandra, about a century later. The "square" of four dots representing the ends of the bull's legs applies only to the latest rulers.

1051. **CANDRA: Dhrticandra**, ca. 576-579, AR 16 ratti (1.93g), Mitch—, Mahlo-39.3var, recumbent humped bull right // srivatsa, VF, **RR**, ex Hans Mondorf Collection \$120 - 160

1052. **CANDRA: Suriyacandra**, ca. 580, AR 24 ratti (2.57g), Mitch—, cf. Mahlo-40 for full unit, recumbent humped bull left // srivatsa, flanked by stylized leaf tendrils, tentative attribution (see Mahlo's image for his #40), but must be of this period - compare the bull and its surroundings to the issues of the immediately previous ruler, Dhrticandra, Fine, **RRR**, ex Hans Mondorf Collection \$250 - 350

1053. **CANDRA: Anonymous**, 5th/6th century, AR 64 ratti (7.47g), Mahlo-App.4.6, Htun-164.3, elephant right, goring a lion // female goddess Ganga, holding flower on tall stem, standing in the jungle, slight weakness of strike, VF, **RRR**, ex Hans Mondorf Collection \$1,500 - 2,000

Mahlo suggests that this type was based on the style of Kumaragupta I (AD 414-455), and there is certainly some artistic resemblance to Gupta prototypes, but an entire different design. There is also some stylistic similarity to the earliest coins of Samatata, also of styles derived from Gupta precedents. The actual origin of this type has not been determined, though the 3 confirmed known specimens are all said to have come from the Bilin area in the Mon district of southeastern Myanmar. This extremely rare type is not listed by Mitchiner, and no examples are yet on Zeno or CoinArchives.

1054. **CANDRA: Anonymous**, ca. 6th century, AR 64 ratti (7.31g), Htun-267.2, crab // scorpion (also called crab both sides), date undetermined, sometime between 4th and 8th century, crude EF, **R**, ex Hans Mondorf Collection \$120 - 160

Appears to be an imitation of the early anonymous issues of Candra (region of Dhanyawadi or Vesali in western Burma).

1055. **HALIN:** AR 80 ratti (9.84g), ca. 400-500, Mitch—, Mahlo-11.1, rising sun, pellet in sun // simplified srivatsa temple, swastika left, bhadrapitha right, VF-EF, ex Hans Mondorf Collection \$110 - 150

Mahlo suggests this type might come from around Maingmaw, about 100 miles northeast of Beikthano.

1056. **HALIN:** AR 88 ratti (10.14g), 6th century, Mitch-98:424/25, Mahlo-47/48, bhadrapitha, 5 lamps above // srivatsa, sankh shell inside, without "nose", 3 pellets below, with crescent below the middle pellet, overstruck on undetermined host, few light scratches on reverse, EF, **RRR**, ex Hans Mondorf Collection \$250 - 350

Obverse with 5 lamps, as Mahlo-47, reverse with small sankha as Mahlo-48.

The bhadrapitha is the altar, with a garland around the center and five lamps above. Mitchiner and others have called it the damaru, which is the Vishnu's hand drum, but an altar seems more convincing.

1057. **HALIN:** AR 80 ratti (9.56g), ca. 6th century, Mahlo-57b.1.1 (same reverse die), Htun-225.3, rising sun, pellet inside // angular srivatsa between ankusa & bhadrapitha, superb example, bold strike, AU, ex Hans Mondorf Collection \$200 - 300

1058. **HALIN:** AR 80 ratti (9.40g), ca. 6th century, Mitch-98:403/05, Htun-240.1, Mahlo-52, wheel of law with 12 spokes, row of pellets around // small image of the temple, hill symbols either side, elaborated wavy water symbol below, VF, **RR**, ex Hans Mondorf Collection \$250 - 350

1059. **HALIN:** AR 80 ratti (8.98g), ca. 6th century, Mitch-98:406, Mahlo-49, wheel of law with 16 spokes, row of pellets around // srivatsa, with bhadrapitha left, swastika right, mount removed, pierced below, F-VF, R, ex Hans Mondorf Collection \$120 - 180

This type has been found largely in the Maingmaw region.

1060. **HALIN:** AR 80 ratti (9.34g), 7th century, Mitch-98:406/08var, cf. Mahlo-49, 16-spoke wheel of law (dharmachakra), with 16 beads in margin // srivatsa, crude bhadrapitha left, swastika right, weakly struck, especially on reverse, as is normal for this series, VF, RRR, ex Hans Mondorf Collection \$350 - 450

All examples illustrated by Mitchiner & Mahlo have 24 or more beads in the margin. This type, with 16 beads, is illustrated by Krisadaolarn & Mihailovs, middle image in plate A21.

1061. **HALIN:** LOT of 1 Halin coin, 1 Srikasetra, and 5 unrelated coins; (1) Halin, AR unit (9.45g), rising sun // srivatsa, with svastika left & bhadrapitha left, fine style, circa 5th/6th century (Mahlo type 8a, VF); (2) tiny coin assigned to Sriksetra (VF) (3) Trebizond asper of Manuel I (4) common Samanid fals of Bukhara AH354; and (5-6) two low quality medieval small coins of Bavaria & Rome of little value; retail value \$300, lot of 6 pieces \$140 - 180

1062. **HAMSAVATI:** AR 88 ratti (9.34g), late 4th century, Mitch-98:489/93, Mahlo-15a.1, sankh shell, open to the left, celestial symbols above // srivatsa, ankusa inside, 2 pellets below, circle & crescent above, early style with broad srivatsa, bold VF-EF, ex Hans Mondorf Collection \$220 - 300

Hamsavati was located not far from Pegu.

1063. **HAMSAVATI:** AR 88 ratti (9.42g), late 4th century, Mitch-98:516, Mahlo-15a.1, sankh shell, celestial symbols above // srivatsa, ankusa inside, 2 annulets below, nothing above, porous surfaces, somewhat roughly cleaned on reverse, VF-EF, ex Hans Mondorf Collection \$120 - 160

1064. **HAMSAVATI:** AR 88 ratti (7.98g), late 4th century, Mitch-98:517/18, Mahlo-15a.2, sankh shell, without tentacles, and without celestial symbols // srivatsa, ankusa inside, 2 pellets below, nothing above, porous surfaces, pierced between the 2 reverse pellets, VF, ex Hans Mondorf Collection \$100 - 140

1065. **HAMSAVATI:** AR 88 ratti (9.54g), 6th century, Mitch-98:521/24, Mahlo-23.1, sankh shell, open to the left // srivatsa, symplified ankusa inside, 2 pellets below, nothing above, compact flan, choice VF-EF, ex Hans Mondorf Collection \$200 - 250

1066. **HAMSAVATI:** AR 88 ratti (9.75g), 6th century, Mitch-98:521/24, Mahlo-23.1, sankh shell, open to the left // srivatsa, symplified ankusa inside, 2 pellets below, nothing above, compact flan, small scratch on reverse, VF, ex Hans Mondorf Collection \$150 - 200

1067. **KYAIKTO:** AV full unit (9.71g), ca. 1st century AD, Mahlo-2.1, Htun-150, sankha (conch shell) // group of three jewels below the *indrayasti*, VF-EF, RR, ex Hans Mondorf Collection \$800 - 1,200

1068. **KYAIKTO:** AV 1/20 unit (0.50g), ca. 1st century AD, Mahlo-2.3, Htun-150.3, sankha (conch shell) // stylized symbol derived from the *indrayasti*, with circles below, but weakly struck, as seems always the case for the small fractional denominations, VF-EF, RR, ex Hans Mondorf Collection \$200 - 300

1069. **LAVAPURA:** AR 80 rattis (9.73g), ca. 6th century, Mitch-98:634, Mahlo-10b, rising sun // simplified srivatsa temple, uncertain symbol to left, swastika right, thick compact flan, VF, R, ex Hans Mondorf Collection \$150 - 200

Mitchiner's suggestion of Lavapura, which lies in Thailand close to the Burmese border, is probably incorrect. Mahlo has noted that most known examples are found in Samon Valley region of Myanmar, south of Mandalay.

1070. **MINEMAW:** AR amulet (11.12g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, ornate image of the bhadrapitha // sriavatsa temple between thunderbolt & sankh shell, twice perforated as always, EF, ex Hans Mondorf Collection \$130 - 170

1071. **MINEMAW:** AR amulet (9.81g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, ornate image of the bhadrapitha // imaginary design, with very stylized elephant at the top, twice perforated, as virtually always, superb quality, VF-EF, ex Hans Mondorf Collection \$140 - 180

The Minemaw types of the Shan Hilltops occur in many designs, mostly derived from earlier Burmese coins, and vary greatly in size. Nearly all are punched twice, presumably for decorative attachment.

1072. **MINEMAW:** AR amulet (10.19g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, ornate image of the bhadrapitha // remote design based on the sriavatsa, "X" left & right, twice perforated as usual, VF-EF, ex Hans Mondorf Collection \$130 - 170

1073. **MINEMAW:** AR small amulet (2.35g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, ornate image of the bhadrapitha // sriavatsa, central axial pole, no symbols above or alongside, pierced twice as always, choice VF, R, ex Hans Mondorf Collection \$130 - 170

1074. **MINEMAW:** AR small amulet (3.67g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, bhadrapitha // sriavatsa, central axial pole, sun & moon above, thunderbolt left, sankh right, close to the Srikshetra prototype, pierced twice as always, VF, R, ex Hans Mondorf Collection \$130 - 170

1075. **MINEMAW:** AR small amulet (3.25g), ca. 10th century or later, Htun, pp. 115 ff, Mahlo, p.165, simplified bhadrapitha // sriavatsa, central axial pole, moon & sun above, thunderbolt left, sankh right, close to the Srikshetra prototype, pierced twice as always, VF, R, ex Hans Mondorf Collection \$130 - 170

1076. **MYAUNGMYO:** Anonymous, dating unknown, AR 80 ratti (8.11g), Mitch-2000:149/50, Mahlo-3, recumbent humped bull right // Kailasha vase of plenty (purnaghata), on a lotus, chipped, VF, RRR, ex Hans Mondorf Collection \$300 - 400

Mahlo reported that about 7 specimens were found in about 4 different sites in southern Myanmar. He has suggested that this is one of the earliest types, circa 2nd-3rd century AD, prior to all issues bearing the sriavatsa on the reverse, which seems highly unlikely. Mitchiner placed it almost a millenium later, also unlikely. By comparison with other coins of the Burmese Kingdoms, some point between the 5th and 8th century seems more credible.

1077. **MYINGYAN:** AR 88 rattis (10.27g), circa 9th/10th century, Mitch-488, Mahlo—, Htun-245.1, local issue, or contemporary imitation, obverse as the Kyaikkatha (Mon) type Mahlo-60 (large broad sankha), reverse as the late Srikshetra type somewhat resembling Mahlo-14b, but very crude, and with inverted ankus to left and crudely engraved vajra to the right, VF, RR, ex Hans Mondorf Collection \$200 - 300

1078. **PYU:** LOT of 3 silver coins: Mitch-356 ff, 20 ratti, sun left, obverse rays 4/4 (choice EF); Mitch-295 ff, 80 ratti, crescent & swastika left, crude style (assigned by Mitchiner to Srikshetra) (light hornsilver, VF); and another version of Mitch-295 ff, but very crude, with the obverse rays not reaching the pellets around, local imitation (much hornsilver, Fine and rare); retail value \$200, lot of 3 pieces, ex Hans Mondorf Collection \$120 - 160

World Coins

1079. **SRIKSHETRA:** AR 10 ratti (1.12g), 2nd/3rd century, Mitch—, Mahlo-6.2.1, sankh shell, with stylized sprouting tendrils on lotus // trisul on lotus, twice pierced (as are most known specimens), VF, RR, ex Hans Mondorf Collection \$100 - 120

1080. **SRIKSHETRA:** AR 96 ratti (10.99g), 4th-5th century, Mitch-98:416/17, Mahlo-12a.2, bhadrapiṭha, 5 lamps above // srivatsa, sankh shell inside, with "nose", large sankh, VF-EF, ex Hans Mondorf Collection \$250 - 350

Mahlo considers this the first type to introduce the srivatsa reverse, but Mitchiner assigned it to the 7th century! This design was revived for a machine-struck issue struck at the British Calcutta mint in 1797.

1081. **SRIKSHETRA:** AR 48 ratti (5.34g), 5th century, Mitch-98:419, Mahlo-12a.3, bhadrapiṭha, 5 lamps above // srivatsa, sankh shell inside, with "nose", small sankh, VF, RR, ex Hans Mondorf Collection \$180 - 220

Struck at the Osaka mint for use in the Japanese occupied Netherlands East Indies. Although some 80,000,000 were struck or ordered to be struck, none were ever placed in circulation. The war situation had worsened to the point that shipping the coins became virtually impossible. Consequently, none of these coins ever reached the East Indies and almost the entire issue was remelted at the mint or simply lost. Dates are from the Japanese Shinto dynastic calendar. They remain extremely rare and historically important.
