It has recently been suggested that this type was not necessarily struck at Ghazna, but by the Mongol military after it departed from Ghazna when chasing Mangubarni towards the Indus River, with minting equipment brought along from Ghazna.

515. **GREAT MONGOLS: temp. Chingiz Khan**, 1206-1227, AE jital (4.16g), NM, ND, A-1969, struck at or near Ghazna during the Mongol advance towards the Indus River, thus during the lifetime of Chingiz Khan, bold strike, choice EF \$110 - 150

526. **GREAT MONGOLS: temp. Ögedei**, 1227-1241, AV dinar (3.04g), Samarqand, AH(6)25, A-O3738, totally anonymous, as type A-B1967 (kalima both sides), mint name and the date in the obverse margin, with the final two digits boldly clear, second known specimen and dated in the first full year of Ögedei's reign, usual weakness, VF-EF, **RRR** \$1,000 - 1,200

Same obverse die as Lot 817 in our Auction 36.

527. **GREAT MONGOLS: temp. Ögedei**, 1227-1241, AV dinar (3.67g), Almaligh, DM, A-3738A, citing the Qa'an and the deceased caliph al-Nasir li-Din Allah, mint name fully clear atop the reverse field, about 25% flat strike, EF, **RRR** \$2,200 - 2,400

The attribution of Ögedei is confirmed by Almaligh dinars dated 6x1 (for 631, Zeno-34942) and 63(4 or 7, Zeno-44047), all of identical style, but different sets of dies. Since Chaghatay was appointed to the east region, with his center at Almaligh (now in the northwest corner of Xinjiang, China), this type can also be assigned to Chaghatay, though his normal coinage (also anonymous) did not appear until at least 635 for gold and in 638 for silver.

528. **GREAT MONGOLS: Anonymous**, ca. 1230s-1240s, AV dinar (2.72g), NM, ND, A-A1967, kalima obverse with the caliph al-Nasir named below, caliph's name & title on reverse, marginal legends illegible, crude VF, **R**, ex. Tony Ettinger collection \$200 - 260

530. **GREAT MONGOLS: temp. Töregene**, 1241-1246, AR dirham (2.78g) (Tiflis), DM, A-1976, Bennett-235, overstruck on a dirham of Ögedei (type A-1973), local variety struck at Tiflis (Bennett-225/233), with the Georgian Mtavruili letter "m" which is the number 40, thus perhaps indicating the Islamic date AH640, VF, **RRR** \$200 - 250

The Ögedei issue of Tiflis (now the capital of Georgia) is normally dated AH637, the issue of Töregene is dated AH642. There is also a Christian fish symbol as graffiti in the margin of the overstrike.

531. **GREAT MONGOLS: Möngke**, 1251-1260, AV broad dinar (5.15g), Dihistan, ND, A-V1977, obverse text *möngkä qa'an / al-'adil / al-a'zam*, mint both below obverse field (clearly legible) and in obverse margin (partly legible), with Qur'an 9:33 in reverse margin, considerable weakness (as usual), very crude VF-EF, **RRR**, ex. Tony Ettinger collection \$240 - 300

Dihistan was located in western Khorasan, now in Turkmenistan, just north of the Iranian border.

532. **GREAT MONGOLS: Möngke**, 1251-1260, AV broad dinar (4.23g), NM, ND, A-V1977, obverse text *möngkä qan / al-'adil / al-a'zam*, kalima reverse, style of Astarabad mint, considerable weakness (as usual), crude VF, **RR**, ex. Tony Ettinger collection \$220 - 280

533. **GREAT MONGOLS: Möngke**, 1251-1260, AR dirham (1.41g) (Imil), AH658, A-S1979, Zeno-78610 (this piece), double trident tamgha, the date appears in words in the obverse margin, confirmed by the three dots above the first letter of *thamân* for "8", followed by clear *khamsin* for "50", with the mint name almost entirely off flan, but confirmed by the type & design, pierced, apparently unique, the first example to confirm that this type was struck before 661-662, VF, **RRR** \$150 - 200

The double-trident was the tamgha of the great Mongol Möngke, who died in AH657, and was retained at Imil and Pulad until 662 for unknown reasons.

534. **GREAT MONGOLS: Anonymous**, AE dirham (6.36g), Bukhara, AH660, A-A1979.2, Arabic *sikka / bukhara* in obverse center, the Chinese name of the city, *bu-hua*, in reverse center, with the mint epithet *baldat fakhira* plus the date in the margin on both side, clear date, minor weakness, F-VF, **RR** \$300 - 400

This type, with the Chinese mint name instead of the Chinese character for "tax" is much rarer than the "tax" variety. An example sold in our Auction 31, Lot 760.

535. **GREAT MONGOLS:** LOT of 13 silver coins (one appears to be heavily debased gold): an **important research group**, mostly anonymous, but some clearly cite somebody named Abu Nasr, others have undeciphered words or names in the field; most cite the caliph al-Nasir, who died in 1225, one cites his successor al-Mustansir; all are crudely struck, and all appear to be from different sets of dies; retail value, if someday identified, should be at least \$1000. **lot of 13 pieces** \$600 - 700

Three pieces bear a bow & arrow above the reverse field, exactly as on the Great Mongol issue of Qunduz (A-1972, Tye-334), except the bow & arrow face upwards, downwards on Tye-334. This suggests that they should be dated in the 1220s to 1230s, some perhaps later. It is best that these be kept together as a research group until they can eventually be securely identified.

536. **GREAT MONGOLS:** LOT of 3 silver and 12 copper coins, by A numbers: A-1968, AE khani (2, one dated 619, the other undated); A-1969, AE jital (2); A-1971, AE jital of Malik of Kurzuwan (2); A-1972, AE fals of Shafurqan; A-1972, AR fals of Qunduz; A-B1973, AE jital; A-1973, AR dirham temp.
